This application is for construction or alteration of buildings owned by the State of Idaho including any of its departments or agencies. See Idaho Code § 39-4103.

Pursuant to section 39-4103 Idaho code the Division of Building Safety is responsible for the issuance of building permits and building inspections for construction projects owned by the State of Idaho or any of its departments or agencies. The building permit pertains to work regulated by the International Building Code, International Energy Conservation Code, International Residential Code (parts I, II, III, IV) and the International Existing Building Code.

Please complete the application and submit it with payment of the fee. The fee table is below. An Excel spreadsheet that will calculate the building permit fee is available at http://dbs.idaho.gov/programs/building/docs/2011_Building_Fees_Calc.XLS If the fee is to be paid by way of an interagency billing, please verify that arrangement with your agency before submitting the application.

The plans, specifications, calculations and other documents need to have been submitted and approved prior to the issuance of this permit. That review and approval have a permit number that needs to be supplied on the application. DBS will help you find that number if needed.

Please provide the names and email addresses of anyone that is expected to submit documents to DBS during the construction process. This may include shop drawings, delayed submittals, special inspection reports and structural observations. These documents can be submitted electronically and we need this information to enable those people to do so.
